Re: RTD Performance – Liner Installation
Kingston Landfill Closure
Kingston, NH

To Whom It May Concern:

H. E. Sargent, Inc. contracted RTD Enterprises of Madison, Maine to furnish and install the Geomembrane liner and Geotextiles for the closure cap and drainage features of the Kingston, NH landfill, with a total approximate value of \$1,000,000. The work occurred from August 2004 to November 2004. During this time, HES found RTD to provide quality service in both their field labor and office management. Please note the following:

1. Submittals were provided on time and in the correct quantities.
2. Field work was performed in a workmanlike manner and productively.
3. Testing was done per stringent specifications, and did not retard production.
4. Meetings were always attended by the site foreman, leading to excellent coordination between HES, RTD, and the Engineer.
5. Construction issues/disputes were handled in a quick and professional manner by the site foreman, avoiding any serious issues/disputes.
6. Payment applications were submitted on time and for the right amount.
7. Warranties were provided in a timely manner to complete the project paperwork.

Please contact me with any questions about this letter.

Sincerely,

A handwritten signature in black ink, reading "Jeffrey A. Hallett, P.E." with a stylized flourish.

Jeffrey A. Hallett, P.E.
